## Image Alignment

From mPDF version 4.2 onwards, in-line images can be individually aligned (vertically). Most of the values for "vertical-align" are supported: top, bottom, middle, baseline, text-top, and text-bottom. The default value for vertical alignment has been changed to baseline, and the default padding to 0, consistent with most browsers.

These images  are  **top**  aligned 

These images  are  **text-top**  aligned 

These images  are  **bottom**  aligned 

These images  are  **text-bottom**  aligned 

These images  are  **baseline**  aligned 

These images  are  **middle**  aligned 

## Mixed alignment

## Image Border and padding

From mPDF v4.2, Image padding is supported as well as border and margin.
